Chapter 17 Evolution Of Populations (17.1) Evolution involves a change in the frequency of alleles in a population over time Relative Frequency (17.1) Comparing the number of times a particular allele occurs in a gene pool, compared with the number of times other alleles for the same gene occur. Chapter 17: Evolution of Populations Flashcards | Quizlet Chapter 17 Evolution of Populations Learn with flashcards, games, and more — for free. Chapter 17 Evolution of Populations Flashcards | Quizlet Biology Chapter 17: Evolution of Populations. Chapter 16- Evolution of Populations (* indicates term with image associated with it) STUDY. PLAY. gene pool. The combined genetic information of all the members of a particular population. relative frequency. Biology Chapter 17: Evolution of Populations Flashcards ... Chapter 17 Evolution of Populations. STUDY. PLAY. Gene Pool. All the genes, including all the different alleles for each gene that are present in a population. Relative Frequency. Number of times a particular allele occurs in a gene pool, compared with the total number of times alleles for the same gene occurs. Chapter 17 Evolution of Populations Flashcards | Quizlet evolution of populations (chapter 17) A new species can form when a population splits into two groups that are isolated from one another. The gene pools of the two groups may become so different that the groups can no longer interbreed. evolution of populations (chapter 17) - wedgwood science A change in the allele frequency of a population as a result of chance events rather than natural selection. bottleneck effect Genetic

drift resulting from the reduction of a population, typically by a natural disaster, such that the surviving population is no longer genetically representative of the original population. Chapter 17 Evolution of Populations Flashcards | Quizlet Biology Chapter 17 Evolution of Populations. form of reproduction isolation in which two populations are separated by geographic barriers such as rivers, mountains, or bodies of water, leading to the formation of two separate subspecies.
