Page Vibrations or oscillations can be regarded as a subset of dynamics in which a system subjected to restoring forces swings back and forth about an equilibrium position, where a system is defined as an assemblage of parts acting together as a whole. The restoring forces are due to elasticity, or due to gravity. Basic concepts in Vibrations - Part 1 - Engineering Solutions Concept-Development Practice Page A pair of pulses travel toward each other at equal speeds. The composite waveforms as they pass through each other and interfere are shown at 1-second intervals. In the left column, note how the pulses interfere to produce the composite waveform
