Fungi Identification Guide

Gratuit Ascomycetes. For ease of use we have grouped all jelly fungi (heterobasidiomycetes) together. Similarly all bracket and crust fungi are also grouped, as also are the various puffballs, earthballs, earthstars and stiltballs that, together with stinkhorns, are by tradition called gasteromycetes (even though there is no scientific justification for their being categorised together other than the fact that they all produce spores inside some kind of ball or 'stomach'). Fungi families picture gallery; identification guide Mushroom identification help. If you know what a mushroom looks like, but not know it's ID, you can

use this list to identify it. The mushrooms are grouped by family, so closely related mushrooms are listed together. Click on the pictures to enlarge them.
