Solution for exercise 1.6.1 in Pitman

This is another version of the birthday problem. We denote the event that the  $r$ st  $n$  persons are born under different signs, exactly as in example 5 page 62.

Correspondingly,  $R_n$  denotes the event that the  $n$ 'th person is the  $r$ st person born under the

Solution Manual This is a passable  
book on probability. It is a halfway  
house between undergraduate  
probability and measure theoretic  
probability. Generally speaking, it  
lacks rigour; statements like "the  
proof is surprisingly difficult so we  
only give a heuristic justification"  
are not good enough, especially  
when the author does not then  
bother to refer the reader to a  
source where the proof can be  
found. Amazon.com: Probability
